Date of production of the KID	31 December 2022

What is this product?

Type Ordinary shares in a public company incorporated in the United Kingdom. Save for payments of dividends made in accordance with its dividend policy from time to time or other returns (e.g. on a winding up), the Company is not expecting to pay you and you are expected to generate returns through selling your shares through a bank or stockbroker. The ordinary shares have no maturity date. Shares of the Company are bought and sold via markets. Typically, at any given time on any given day, the price you pay for a share will be higher than the price at which you could sell it.

Objectives The Company's investment objective is to provide shareholders with an attractive level of dividend income and capital growth through fees earned by its investment management activities combined with returns on its asset-based direct lending investments. The Company has borrowed and may borrow to purchase assets from time to time. This will magnify any gains or losses made by the Company.

Pollen Street plc is an asset management company, in the form of a UK listed investment trust, that benefits from a complementary set of investment management activities and balance sheet activities. Pollen Street was founded in 2013 and is an independent, alternative investment management company dedicated to investing in the financial and business services sectors. Pollen Street has extensive experience investing in both credit and private equity strategies and has a strong and consistent track record of delivering top-tier returns. The on-balance sheet investment portfolio invests in high-quality, diversified and low-risk asset-based direct lending investments, with potential to generate high-income returns, together with strong capital preservation.

Intended retail investor The ordinary shares are listed on the Premium Segment of the Main Market of the London Stock Exchange and as such are intended for investors who understand and are willing to assume the potential risks of capital loss and that there may be limited liquidity in the underlying assets of the Company.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7 which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are very unlikely to impact your returns. The price at which shares in the Company are sold in the market has not historically tracked the Company's net asset value per share.

The whole amount of your invested capital in the Company is at risk and there can be no guarantee that you will get back any or all of the amount invested on a sale of shares in the Company. The price at which shares in the Company are sold in the market has not historically tracked the Company's net asset value per share. References to the company paying you money are required. While you may receive some dividends from the company during your investment the majority of your return will come from the buyer of your shares when you sell.

Performance Scenarios

This table shows the money you could get back over the next 5 years under different scenarios, assuming that you initially invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not exact indicators. What you will get will vary depending on how the market performs and how long you keep the investment. The figures are calculated according to the PRIIPs methodology and take into account, among other things, movements in share prices.

The stress scenario shows what you might get back in extreme market circumstances and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Investment scenarios		1 year	3 years	5 years (recommended holding period)
Stress scenario	What you might get back after costs	4,284	6,145	5,265
	Average return each year	-57.2%	-15.0%	-12.0%
Unfavourable scenario	What you might get back after costs	9,157	8,746	8,558
	Average return each year	-8.4%	-4.4%	-3.1%
Moderate scenario	What you might get back after costs	10,169	10,489	10,820
	Average return each year	1.7%	1.6%	1.6%
Favourable scenario	What you might get back after costs	11,247	12,530	13,625
	Average return each year	12.5%	7.8%	6.4%

What happens if Pollen Street plc is unable to payout?

As a shareholder of Pollen Street plc you would not be able to make a claim to the Financial Services Compensation Scheme nor any other compensation body about the Company in the event that the Company were unable to pay any dividends or other returns it may elect to pay from time to time, or if it were unable to pay any amounts due to you on a winding up at the end of its life.

What are the costs?

Presentation of Costs

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The Company is required by law to include the information above and below without any changes. That law was drafted for investment products which pay returns directly to investors, not those for which a return is expected to be delivered by the investor selling shares on a market. The Performance Scenarios above are shown based on share price returns together with returns from dividends or other distributions net of estimated costs. The costs shown below, all of which are borne by the Company, have no direct impact on share price performance of the Company's ordinary shares.

If you chose to sell your shares, you would pay your bank's or stockbroker's dealing charges and be selling at the then available market offer price. That is likely to be lower than the bid price at which other investors could buy shares at that time. Prices quoted for shares in the media are typically the mid-price, being half way between the offer price and the bid price.

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Investment scenarios £10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the recommended holding period
Total costs	340	1,034	1,748
Impact on return (RIY) per year	3.4%	3.4%	3.4%

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

The impact on return per year			
One -off costs	Entry costs	0.00%	No entry costs are payable when you acquire ordinary shares, although you may be required to pay brokerage fees or commissions, or stamp duty
	Exit costs	0.00%	No exit costs are payable when you dispose of ordinary shares, although you may be required to pay brokerage fees or commissions.
Ongoing costs	Portfolio transaction costs	0.68%	The impact of the costs of us buying and selling underlying investments for the product. In addition to these costs, there are fund level financing costs.
	Other ongoing costs	1.94%	The impact of the costs that we take each year for managing your investments and the costs associated with running the Company.
Incidental costs	Performance fees	0.77%	The impact of the performance fee. We take these from your investment if the adjusted NAV of Company outperforms a compounding annual rate of return of 5%.
	Carried interests	0.00%	The impact of carried interests.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

There is no required minimum holding period for the shares in the Company, with investors being able to sell their investment in the Company's shares at will on the London Stock Exchange. The recommended holding period in this document is for illustrative purposes only..

As the Company's shares are listed on the London Stock Exchange, you can expect to sell them at any time through your bank or stockbroker. No fees or penalties are payable to the Company on sale of your investment but you may be required to pay fees or commissions to any person arranging the sale on your behalf

How can I complain?

As a shareholder of the Company, you do not have the right to complain to the Financial Ombudsman Service (FOS) about the management of the Company. If you have any complaints about the Company, you may lodge your complaint:

- via our website www.pollenstreetgroup.com
- in writing to Investor Relations, 11-12 Hanover Square, London, W1S 1JJ United Kingdom.

If you have a complaint about a person who is advising on, or selling, an investment in the Company's shares you should pursue that complaint with the relevant person in the first instance.

Other relevant information

We are required to provide you with further documentation, such as the Company's latest prospectus, annual and semi-annual reports. These documents and other information relating to the Company are available online at www.pollenstreetgroup.com. The cost, performance and risk calculations included in this KID follow the methodology prescribed by the Regulation. Past performance is not indicative of future performance.
